

Leading US-based Manufacturing Firm Elevated Quality of Shipping Solution with Dynamics 365 Business Central

About the client:

A leading manufacturer of high-performance landscape edging and restraint systems in the US. They are renowned worldwide for manufacturing application-driven 'performance-based' products that provide a quick and easy installation method with the highest level of visual aesthetics.

Our offerings to the client:

- DemandDynamics studied the customers' business process across Procurement, Sales, Production, CRM, and Financial Management modules.
- The team brought additional enhancements in procurement, production, sales, CRM, and financial management modules, after which they resolved the issues prevalent in the current implementation.
- Experts at DemandDynamics coordinated with the WMS add-on provider to offer solutions to shipping-related requirements.
- Essential training to make the client well-versed in BC core modules like Accounting, Procurement, Sales, and CRM.

Benefits

- ✓ Enhancement in business processes with the help of Dynamics 365 Business Central.
- ✓ DemandDynamics provided employee training to improve work efficiency in a short span of adoption.
- ✓ The Business Central solution clarified all shipping-related requirements, which elevated the quality of shipping solutions.
